northernwolf-portfolio.vercel.app | github.com/northernwolf00 | linkedin.com/in/guwanch-haldurdyev

PROFILE

Mobile developer with 5+ years of commercial experience shipping production Android and iOS applications — 20+ apps live on Google Play and the App Store across ride-hailing, logistics, e-commerce, e-reading and hospitality. Strong in Flutter and Kotlin/Compose Multiplatform with clean, testable architecture, and comfortable owning a product end-to-end, from first screen to automated tests, CI/CD and store release. Currently building a UAE school-management platform remotely for a Dubai company.

EXPERIENCE

Mobile Developer (Remote Contract) — Software company (client confidential)

Nov 2025 – Present • Dubai, United Arab Emirates (Remote)

- Build **EduVestra**, a school-management platform for private schools in the UAE and GCC, covering grades, attendance, timetables, payments and virtual classes for parents, teachers, students and administrators.
- Set up the full quality pipeline: unit and widget test suites plus CI/CD for automated builds, signing and Play Store deployment.
- Implemented UAE data-residency and PDPL privacy requirements, and shipped the app to Google Play working with a remote, cross-border team.

Freelance Mobile Developer

Dec 2024 – Nov 2025 • Ashgabat, Turkmenistan

- Built ride-hailing products (**Rahat Ulag**, **Kerwen Taxi**, **Kerwen Driver**) with Kotlin Multiplatform and Compose Multiplatform, sharing business logic across Android and iOS.
- Deployed a self-hosted vector map tile stack (TileServer GL, Planetiler, OpenMapTiles, Nginx, Docker), removing third-party map costs and enabling offline-friendly maps.
- Shipped **106 Cargo** (logistics), **elkitap** (e-book reader), **Ozan** (e-commerce), **Ahal Info** and **Aýdymçy** for Android and iOS; published **sakura_epub**, an open-source Flutter EPUB package, to pub.dev. Taught an eight-module Turkmen-language Flutter & BloC course.

Mobile Developer — Sanly Hyzmat

Mar 2024 – Dec 2024 • Ashgabat, Turkmenistan (Hybrid)

- Developed Flutter applications for digital-service products on Android and iOS: feature delivery, REST API integration and Firebase (Auth, FCM, Crashlytics).
- Managed store releases on Google Play Console and App Store Connect — signing, staged rollouts, crash triage and policy compliance.

Mobile Developer — Pikir

Nov 2023 – Mar 2024 • Ashgabat, Turkmenistan (Hybrid)

- Built and published a suite of digital restaurant menu apps for iOS — **Kebapchy**, **Gala**, **Mado**, **Balykchy** — with multi-language menus and offline content.
- Handled App Store Connect submissions end-to-end, resolving review guideline, IAP and privacy issues.

Mobile Developer — Kamil Ulgam

Mar 2023 – Oct 2023 • Ashgabat, Turkmenistan (Remote)

- Delivered Flutter features for client applications in a fully remote team; standardised architecture on BloC/Cubit, GetIt DI and feature-based modules, cutting delivery time and defect rates.

Mobile Developer — Turkmenportal

Nov 2021 – Mar 2023 • Ashgabat, Turkmenistan

- Developed and supported transport and GPS-tracking apps — **Duralga** and **Onlaýn taksi (driver)** — in Flutter and native Android (Java/Kotlin), with real-time location, background services and Google Maps.
- Integrated REST APIs, Firebase push notifications and analytics; improved performance and offline caching on content-heavy screens.

TECHNICAL SKILLS

Languages

Dart, Kotlin, Swift, Java

Mobile

Flutter, Flame, Jetpack Compose, Compose Multiplatform (KMP), Android SDK, SwiftUI

Architecture

BLoC / Cubit, MVVM, Clean Architecture, GetIt DI, modularisation, unit & widget testing

Backend & APIs

Firebase (Auth, FCM, Crashlytics, Firestore), REST, gRPC, WebSockets, Google Maps, MapLibre, self-hosted tiles

Release & Monetisation

Google Play Console, App Store Connect, RevenueCat, AdMob, in-app purchases

Tools

Git, Gradle, Docker, Nginx, Figma, CI/CD (GitHub Actions)

SELECTED PROJECTS

EduVestra — school-management platform for UAE schools; Play Store

Rahat Ulag — city & intercity taxi app; KMP/CMP with live trip tracking. Google Play

Kerwen Taxi / Driver — paired rider and driver apps on a shared KMP core

sakura_epub — open-source Flutter package for rendering EPUB books. pub.dev

ACHIEVEMENTS

Bronze medal (3rd place) — Open Mathematical Olympiad for University Students (OMOUS), Ashgabat — 2020, 2021, 2024

Turkmenistan national team — International Student Team Competition in Mathematics (ISTCiM), University of Silesia, Poland — 2021

International Mathematics Olympiad, RUDN University, Moscow — Nov 2023

NSUCRYPTO — International Olympiad in Cryptography, participant

RevenueCat Shipaton hackathon — **fitFriend** (2025), **Garagum Racing** (2026)

100+ public GitHub repositories (Flutter, Kotlin/KMP, Go)

EDUCATION

BSc, Applied Mathematics & Information Technology

Oguz Han Engineering and Technology University
2019 – 2024 • Ashgabat, Turkmenistan

LANGUAGES

Turkmen — Native

Turkish — Native

Russian — Professional working proficiency

English — Pre-intermediate (B1)
